

I would love to tell you how my family doc rocks. Three years ago I was in a roll over car accident at Wilkie, SK. Thank god for STARS Air Ambulance who brought me into Saskatoon with a broken neck. When I arrived at Royal University Hospital, I opened my eyes to see my family doctor at my bedside. I was so happy I reached up to give her a hug. Later I asked her, "how did she know I was there? Her reply was, "my family phoned her office, they phoned her and she came." At the time, I knew she was on holidays and she still came to see me. That's a doc that rocks. I would love to nominate her for My Family Doc Rocks Award.
