

Dr. Pierce has been my GP for about 20 years and I am grateful for the high level of care I have gotten on every visit. It is very apparent she really CARES. She shows respect for my personal dignity, my finances, and my time and energy. She provides holistic care before it was trendy. She includes my opinion even if she doesn't agree. I've required referrals to many specialists and she has been helpful in advocating and when needed follow up. I work in health care so I know finding this level of quality in a family doctor is not easy...she is my rock!
